

“He builds the structure that calms the chaos, so leadership can grow the company.”

I BUILD THE SYSTEMS THAT CALM THE RIPTIDE · REFERENCES ON REQUEST

Founder of SOPITA.GG and BingoBango.ai. Physical product under real constraint. When exceptions hit from every angle, swimming harder isn’t a strategy — structure is. ~\$710M is the sharpest proof, not the whole seat.

~\$710M returned to the business systems I designed	90th %ile service held while cutting cost	–17% logistics cost across the network	18+ decision systems behind the method
--	--	---	---

PROOF

>\$900M → ~\$190M · ≈79% · ~\$710M unlocked

Bed Bath & Beyond Group · multi-banner · 16 DCs · >\$11B sales · systems designed 2014–2020

20–35% Published PE / consulting inventory program “success” band (12–18 mo). Industry range—not a peer survey.	~79% · ~2–4× that band On managed inventory I systemized. Dollar scale matches company-wide programs—not a SKU cleanup.
--	---

Also: Cra-Z-Art VP Global SC—\$80M obsolete with no prior path (proof of drivers, not a ceiling; same method scales toward ~\$800M-class books); ~150 SKUs/mo; multi-country / tariffs; COVID repurpose. Foundation: \$140M OTB · 95% obsolete eliminated (Baker & Taylor).

WHAT CHANGES WHEN WE PARTNER

Room to lead I take the riptides (stockouts, excess, “where is the cash?”) and install cadence. You return to people, product, and vision.	Cash free + network tight Free cash without starving live SKUs. Compress waste (logistics –17%). Structure that holds as the book grows.	Service held + room to expand 90th %ile under pressure. Encode cadence so the team can run it. Scoreboard: cash free, service held, hours returned.
--	--	---

THE OFFER — 90-DAY SPRINT

One product. I don’t staff fire drills. I sit with you, free the book, and encode the method so the team runs it. The first conversation is free. The sprint has a number we set when the book is on the table.

1–30 · Map

Cash, service, network, planning gaps, exceptions still on you. Truth with respect—risk, hours, hope.

31–60 · Clear

Move what should move. Protect core service and funder SKUs. Light cadence the team can keep.

61–90 · Encode

Parameters, algorithms, automation on tools you already pay for. Scoreboard: cash free, waste down, hours returned, service held.

SYSTEMS (HOW IT SCALES)

18+ algorithms (forecast, turns, order efficiency, JIT, replenishment) — the layer behind the capital move. **AI / data:** Claude Code and GitHub Copilot in the editor; LLMs for analysis; Python against Google Cloud SQL and MySQL (Dropbox where the team already files). Encode the method on the stack you already pay for. Certifications (Anthropic, NVIDIA, Apple developer track) support live use. Cash, service, and network still lead.

EXPERIENCE (ONE LINE EACH)

VP Global Supply Chain · Cra-Z-Art (2020–) · \$80M obsolete · logistics –17% · 90th %ile service · Claude Code, Copilot, Python, Cloud SQL / MySQL · multi-country / tariffs · CEO-direct

Sr. Manager, Replenishment · BBB Group (2014–2020) · 18+ algorithms · >\$900M → ~\$190M managed inventory · 16 DCs

Foundation (2006–2014) · Baker & Taylor: \$140M OTB · 95% obsolete eliminated · **LaRose Industries, LLC d/b/a Cra-Z-Art · Children’s Place** · CEO-direct early · EN / ES / PT

Next: Tell me the vision—and what is in the way.

If I am the right partner, we talk. If not, I say so with respect.
